

WMD

The 7S WMD has high performance rails and a super thin swallow tail that gives quick acceleration and thrust out of every bottom turn.

The WMD's entry rocker and tail are very flat allowing the rider to get in and set up early as well as generate speed quickly after spins and vertical cutbacks. It's signature 3/4 length single concave enhances the easy rocker profile providing plenty of lift.

The WMD's single flyer swallow tail is combined with a spiral vee behind the front fins giving the board two major advantages: the drive of a thruster and the pivot and easy recovery of a wide twin fin.

Ride it as a thruster or a twinstar - with a little trailer fin. This board is designed to go fast.

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
5'9"	19 3/8"	2 3/8"	27 ltr	FCS M5	0-154lbs (0-70kg)
6'1"	20 1/2"	2 7/16"	30 ltr	FCS M5	165lbs (75kg)
6'4"	20 5/8"	2 1/2"	33 ltr	FCS M5	176lbs (80kg)
6'7"	20 3/4"	2 5/8"	38 ltr	FCS M5	198lbs (90kg)
