

F4 HIGH PERFORMANCE QUAD

The SLX F4 is lightning quick. The rails on the F4 are low volume and sensitive which makes this board really lively under your feet. The tail rocker in this board really responds to off the tail surfing and loves to be pushed into critical situations.

The F4 is the next generation in performance longboarding. This board is light, thin and fast, with a Quad fin option for those looking to loosen things up and take speed to the next level.

The F4 is super fast, and drives hard off the bottom with its pin-tail template and hard edges in the tail. The 17" nose will even let you sneak in a quick noseride.

This is one for the performance guy looking for great off-the-tail performance, and down-the-line speed. It's an essential to any serious longboarders quiver.

Neutral Rail

2-7ft Waves

Intermediate - Advanced
