

Afterburner

The Afterburner is a semi-fish, with just enough width and thickness to increase glide and paddling speed significantly without surfing flat like a standard fish.

The slightly lower rocker compliments the width and thickness increases, and gives the 'on rail' drive to better harness the speed and manourability of the loose planeshape.

The full length double concave combines with the softer front rail gives this board lift and speed with total forgiveness. The harder rail near the tail creates the grip giving this design more range than any standard fish.

If you are looking for a one board quiver you can not go wrong by selecting this model.

Double Concave

Full Rail

2-6ft Waves

Intermediate - Advanced

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
6'0"	19"	2 1/4"	26 ltr	FCS M3	0-165lbs (0-75kg)
6'2"	19 1/4"	2 3/8"	28 ltr	FCS M5	176lbs (80kg)
