

THE ONE

Drive, Grip, Speed. "The One" sets the standard for the all-rounder. In Greg's own word's, "I wanted to provide the feel of my favourite board in a series of current shapes that was easy to understand and performs no matter what the condition."

Well, once again, Greg has done exactly what he set out to do. "The One" can be ridden 3" to 4" shorter than your standard shortboard because it's ridden a touch wider too, which makes it a really stable platform to push your surfing to next level from.

"The One" has a full planshape, moderate curves, a super neutral rounded square tail and thruster set up that provides a ton of drive but still breaks loose when you jam it. The lower entry sets the board up for ripping small surf while the full volume adds paddle power.

"The One" is the perfect answer to a stable, high performance all-rounder.

LENGTH	WIDTH	THICK	VOLUME	FINS	APPROX WEIGHT RANGE
5'8"	18 1/4"	2 1/4"	25 ltr	FCS M3	0-143lbs (0-65kg)
5'10"	18 3/4"	2 3/8"	28 ltr	FCS M3	154lbs (70kg)
